

# **COFFEE VENDING MACHINE**

The coffee vending machine is a user-friendly system devised to dispense various beverages upon acceptance of suitable currency.

- The user selects a product from the available list displayed by the machine.
- The user is prompted to enter an appropriate amount of cash corresponding to the products they have selected.
- The machine accepts the cash, and tenders the change amount, if any. Upon successful transaction, it dispenses the product. If an unexpected error is encountered, it displays an error message to the user.
