

# **COLLEGE INFORMATION SYSTEM**

The college information system enables educational institutions in managing relevant data. It enables a college to manage their activities as well as organize staff and student information.

- Colleges can view and edit information regarding students and staff.
- Colleges have the power to create and edit events in the calendar.
- Staff can view and edit student data, their submissions, student grades, etc.
- Students can use the information system to submit coursework and view their current and final grades, as well as the results of any assessments.
